

Annually, we help save over 15,000,000 Trees

# SHRED-TECH'S GREEN COMMITMENT

## ENVIRONMENTAL STEWARDSHIP

Our Truck Fleet meets the EPA's strict new low emissions standards and operates on ULSD (ultra-low sulfur diesel fuel) or B5 Biodiesel fuel. Every year, the paper shredded and recycled by Shred-Tech-built trucks, saves over 15,000,000 trees! Shred-Tech continually focuses on ways to help you grow your business while reducing your carbon footprint.

Shred-Tech is committed to providing the most efficient and environmentally friendly shredding and collection vehicles available, and we are pleased to introduce new features and equipment that follow Shred-Tech's Environmental Stewardship.

Thinking Green Since Day One!

# SELECT MOBILE COLLECTION TRUCKS

SELECT SERIES  
OUR MOST VERSATILE & EFFICIENT PAPER COLLECTION TRUCK

# SELECT SERIES

Shred-Tech's most versatile & efficient collection Truck

## ABOUT SHRED-TECH

Established in 1978 Shred-Tech® is a world leader in designing and manufacturing mobile and stationary shredding and recycling systems. Shred-Tech® has installed more than 6,000 shredding and recycling systems worldwide and is recognized globally for its commitment to engineering innovation and quality. Shred-Tech® is headquartered in Cambridge, Ontario Canada and has operations in North Carolina-USA, Bedford-England, Chonburi-Thailand as well as distributors in the UK, Australia and Japan.

## VERSATILITY / SHREDDING PLANT USE

The Select Series is designed to be used in conjunction with a shredding plant, or a satellite facility where paper is consolidated for transfer. Paper can be bulk loaded onto the walking floor; an ideal configuration for unloading directly onto a conveyor or floor.

## PRODUCTIVITY

With a legal payload of up to 13,000lbs, it makes short work of even the busiest route. It has double the payload of a conventional straight truck.

## TRANSFER MARKET USE

The Select Series can be pre-loaded with plastic bulk bins (plastic gaylords), which can be filled individually, allowing for paper sorting during the route. Bins can be off-loaded quickly and safely at a loading dock using the walking floor, or they can be sealed and shipped to your shredding plant. The bins are collapsible to allow for stacking and storage upon return to the collection market or depot.

## LAYOUT & CONTROLS

This Paper Collection Truck uses many of our state-of-the-art shredding truck features, such as the bin tunnel, Gripper Tipper® and PLUS+1® microcontroller system.

## ADDED STORAGE

For added convenience, there is a separate storage compartment for 64 & 96 gallon carts or empty file boxes; with passenger side access.

SELECT SERIES	SIDE LOAD			REAR LOAD

## Optional Equipment

### CONVENIENCE

- Back up Camera With S/S Guarding
- Aluminum Tool Box
- Strobe Light Package
- Wheel Chocks & Holders
- Tool Kit
- Biodegradable Hydraulic Oil System

### PRODUCTIVITY

- HDS-5 Hard Drive Shredder
- Cart Storage Room
- 32 Gallon Cart Adapter

### WEIGH SCALES

- Portable Platform (Legal for Trade)
- Tipper Mounted (Not Legal for Trade)

### COLD WEATHER OPTIONS

- Electric Hydraulic Oil Plug in Tank Heater
- AC/DC Hydraulic Oil Heater

### MISCELLANEOUS

- Paint Other Than White
- Graphics

### WARRANTY

- Chassis Extended Warranty
- Shred-Tech 3<sup>rd</sup> Year Parts Warranty**
- Body & Bin Tunnel
- Walking Floor
- Bin Tipper
