

Annually, we help save over 20,000,000 Trees

# SHRED-TECH'S GREEN COMMITMENT

## ENVIRONMENTAL STEWARDSHIP

Our MDX Fleet meets the EPA's strict new low emissions standards and operates on ULSD (ultra-low sulfur diesel fuel) or B5 Biodiesel fuel. All MDX trucks are equipped with Shred-Tech's Predictive Idle with auto shutdown and remote panel start/stop. Predictive Idle senses low shredder loads and shuts off the high engine idle when the shredder is unattended and the hopper is empty. Moments later the PTO's are turned off along with the engine, reducing fuel consumption and lowering engine hours.

Shred-Tech is committed to providing the most efficient and environmentally friendly shredding and collection vehicles available, and we are pleased to introduce new features and equipment that follow Shred-Tech's Environmental Stewardship.

Thinking Green Since Day One!

2 Year-Limited Warranty

MDX-LINE MOBILE SHREDDING TRUCKS  
ULTRA HIGH SECURITY

\*Throughput is an estimate based on actual test data and can vary depending upon many factors, including paper type, system maintenance and operator training. \*\*Legal Payload Capacity is an estimate based on chassis GVW only. Actual payload can vary depending on many factors including paper type, weather conditions, and system maintenance. Shred-Tech does not guarantee throughput or payload results.

\*\*\*Shred-Tech performs particle size analysis with new shredders in a controlled test environment. Particle size is affected by knife wear, shredder condition, operating conditions and types of paper being shredded; any variations in these parameters will affect particle size. Therefore Shred-Tech does not guarantee shred size nor does Shred-Tech warrant compliance to any particle size standard including but not limited to standards issued by the following organizations; DIN, NAID, BSIA, RCMP. All Shred-Tech Shredders are available under US Federal Supply Contract.® All rights reserved. Shred-Tech and Shred-Tech logo are registered trademarks of Shred-Tech. Specs correct at press time, and may change without notice. 181001

# MDX-LINE

Ultra High Security, Performance & Payload

## ABOUT SHRED-TECH

Established in 1978 Shred-Tech® is a world leader in designing and manufacturing mobile and stationary shredding and recycling systems. Shred-Tech® has installed more than 6,000 shredding and recycling systems worldwide and is recognized globally for its commitment to engineering innovation and quality. Shred-Tech® is headquartered in Cambridge, Ontario Canada and has operations in North Carolina-USA, Bedford-England, Chonburi-Thailand as well as distributors in the UK, Australia and Japan.

## SHREDDER

The Patent Pending MDX Mobile Shredding Units are revolutionary dual mode systems. They are able to be switched between standard and high security modes at the touch of a button. When operating in standard mode the bulletproof ST-15H shredder achieves up to 6,500 lbs/hr of throughput.

Activating the high security mode produces an incredibly small DIN certified shred size while maintaining impressive throughput. Shred-Tech's MDX-Line features the first high security Mobile Shredding Units which do not rely on screens or moving additional shredders in and out of position. This makes these systems user friendly, reliable, easy to service and cost effective.

## AUGER COMPACTOR & AUTO UNLOADING

MDX trucks come equipped with Shred-Tech's twin-screw angled compactor design and durable moving floor unloading system. Together, these features ensure maximum payload of up to 13,000 lbs and rapid discharge of shredded materials in a few minutes, equating to more time on-route shredding paper and generating revenue.

## BIN TUNNEL & CONTROLS

As with all Shred-Tech Mobile Shredding Units MDX trucks are equipped with the proprietary and patented Gripper Tipper® loading system. This system allows for easy ground or curb level loading of any industry standard container. Shred-Tech was the first company to offer a retractable bin tunnel and this important feature has been included on this model. The bin tunnel works with the Gripper Tipper® to provide a safe working environment and to protect your customers' secure information during the loading process.

The state of the art Plus+1® micro-control system offers many advantages. It works in concert with the standard shredder and paper area cameras to provide real time video of the shredding process. This allows for the operator to monitor the process and customers to witness the destruction of their sensitive information. Additionally the Plus+1® system communicates with the truck chassis to provide information and allow for the remote start and stop capability. It also provides shredding system performance data and can individually actuate each system component in maintenance mode. You don't have to guess what is happening with your Shredding Truck when it has the Plus+1® system, you'll know.

Two Year Limited Warranty

## OPTIONAL EQUIPMENT

### SAFETY & CONVENIENCE

- Biodegradable Hydraulic Oil System
- Back up Camera With S/S Guarding
- Aluminum Tool Box
- Strobe Light Package
- Wheel Chocks & Holders
- Tool Kit

### PRODUCTIVITY

- HDS-5 Hard Drive Shredder
- Cart Storage Room
- 32 Gallon Cart Adapter

### WEIGH SCALES

- Platform (Legal for Trade)
- Tipper Mounted (Not Legal for Trade)

### COLD WEATHER OPTIONS

- Electric Hydraulic Oil Plug-in Tank Heater
- AC/DC Hydraulic Oil Heater

### MISCELLANEOUS

- Paint Other Than White
- Graphics

### WARRANTY

- Chassis Extended Warranty
- Shred-Tech 3<sup>rd</sup> Year Parts Warranty**
- Shredder, Auger, Hopper
- Body & Bin Tunnel
- Walking Floor
- Bin Tipper
