## COLLECTION TRUCKS

The MCS-33/33T: The Fusion of Productivity and Convenience

The document shredding industry's most efficient collection trucks. Loaded with features, it boasts up to 13,000 lbs of payload capacity, and holds twice the paper as a 24' straight truck. The MCS-33/33T are perfect additions to your shredding operation.

### LOADING

The proprietary and patented Gripper Tipper® is capable of handling all bin types including 64, 96 and 175-gallon containers with a "One Step" operation. Multiple tipping locations allow for tipping up to 3 bins in 15 seconds. The expandable and lockable bin tipper enclosures provide a sealed compartment which ensures material is protected from environmental elements while maximizing security and operator safety.

### CONTROLS

The LCD monitor, conveniently located on the control panel, allows for constant payload monitoring. Bins are loaded at curb-level utilizing convenient yet rugged hydraulic control levers.

### AUTO UNLOADING

Both models feature a walking floor for quick and easy unloading. When maximum capacity is reached, the operator simply activates the active floor and in minutes is back on route. Less time unloading equates to more time generating revenue.

### MCS-33T

The MCS-33T utilizes a forward double-wide bin tipper and a single wide rear cart tipper.

### MCS-33

The MCS-33 is equipped with a double-wide forward tunnel and cart tipper.
